

OFRA Cosmetic Laboratories was founded in Fort Lauderdale, Florida, USA by Ofra and David Gaito in 1999 after their relocation from Australia with the goal to create a skin care and makeup line. OFRA is the leader in manufacturing products made with natural ingredients such as plant, marine and vegetable extracts and specializes in ingredients such as Retinol, Argerline (Peptides from Amino Acids), Vegetable Growth Hormone, Vitamin C, Glycolic and Lactic Acids, Sodium Hyaluronate, and other organic compounds with anti-aging and repairing benefits. All products from the OFRA lines are Health Department approved and hypoallergenic.

However, OFRA Cosmetics is not Mrs. Gaito's first experience in the beauty industry. A CIDESCO Therapist (the most advanced certification in the field of Esthetics and Beauty Therapy in the world) and makeup artist began her career in Johannesburg, South Africa in 1979. The success of her first salon and spa inspired her to open a second, both thriving throughout the 80's. In the early 90's, Mrs. Gaito expanded her business and experience working in products distribution for European cosmetic companies in South Africa, Australia, and New Zealand markets. Today, OFRA Cosmetics is a world class company, providing the beauty industry with the solution to every skin problem as well as cosmetic desire.

These products are not just for the professional and the celebrity, but for the everyday makeup wearer as well as cosmetology students. OFRA prides itself on being an accessible, affordable tool for every level of beauty consumer and has provided training to students at beauty schools across the United States as well as exhibited at professional trade shows such as The Makeup Show New York and The LA Makeup Show. A number of our products have been featured in industry and popular publications including Makeup Artist Magazine, AM New York, Life & Style, Better Homes & Gardens, Allure, Family Circle, Women's World and Lucky (all recent press and media write-ups can be found on our [Facebook page](#) and [website](#)). OFRA is an internationally recognized name available worldwide through our website and with distribution in Turkey, Russia, Romania, Philippines, Mauritius, Pakistan, Colombia, North America, and Australia.

SKIN CARE

OFRA Cosmetic Laboratories offers advanced products designed by a research team of specialized doctors and chemists, all licensed in the United States and France. This unique skin care line offers products for all skin types in any weather condition using technologically advanced formulas specializing in Retinol, Argerline, Vegetable Growth Hormone, Silk Peptides, Lady's Mantle and Vitamin C.

OFRA's skin care treatments and techniques can lighten skin texture (reduce pigmentation), reduce refine lines, hydrate and rejuvenate the skin.

OFRA's line of skin care products have been designed specifically for professional use and are available as one treatment or as a series of seven to ten treatments for long lasting effects so clients leave the spa with a new sense of beauty and well-being. We do, however, recognize the limits of results achieved at the hands of a professional in the spa/salon. With sophisticated formulas and attractive packaging, OFRA's retail skin care line of products allows clients to achieve salon/spa results everyday in the comfort of their homes.

MAKEUP

As with all of OFRA's products, the entire makeup line is suitable for even the most sensitive skin types, is hypoallergenic, cruelty free, hypoallergenic and long lasting. All products are packaged in OFRA's signature black packaging and are competitively priced. OFRA's Cosmetic Laboratories has an impressive distribution network and most makeup wearers have already been exposed to OFRA's superior manufacturing techniques and capacity for mass market production (OFRA has produced millions of eye shadows for other labels).

The line includes moisturizing lipsticks in a wide variety of colors as well as long lasting liquid lipsticks, eye shadow in both velvety matte and shimmer, 3D cream and powder technology, loose mineral shadows, mascaras containing keratin and approved for contact lens wearers, easy to apply eye and lip liners as well as gel eye liners, mineral loose powder foundations, tinted moisturizers, Silk Peptide long lasting liquid foundations, oil free compact foundations and moisturizing liquid foundations in a wide variety of colors, beautiful shades of compact and cream blushes, mosaic and marble powders.
